QUICK USER GUIDE CABLE DRUM KR-200

Structure - Cable Drum

1	Drum fastening hooks
2	Housing made from anodized aluminum
3	Control panel
4	Connecting cable Profi 3
5	Sensor-controlled lever for automatic cable un- and rewinding
6	Spindle shaft
7	200 m Kevlar® reinforced cable
8	Supporting feet
9	Connecting plug crawler

WARNING!

Electrical hazard!

Electric current may cause most severe injuries or death. Therefore:

- Always de-energize the device before performing work on it (e.g. cleaning it).
- In case of damaged insulation or individual components, there is a risk of death by electric shock. Cease inspection immediately and send device in for repairs.

WARNING!

Risk of injury from running cable drum!

Unwinding or rewinding the cable constitutes a risk of injury through the revolving drum. Therefore:

- While in operation, never reach directly into the cable drum!
- The emergency switch must be readily accessible to the user during operation at all times!

Structure and Functions - Control Panel

1 **Emergency switch:** Release engaged emergency switch by turning it.

2 **2-axis-joystick for crawler control:** When the joystick is being pushed up or down, the crawler drives forwards or backwards.
Is the joystick, at the same time, being pushed to the right or left, the crawler steers in the respective direction.

3 **Manually rewinding cable:** The cable will be rewound as long as the blue button is being pushed. The crawler does not drive backwards in the same process!
